TITLE : SPRAY COMPOSITION FOR COATING HUMAN BODY

ABSTRACT : PURPOSE: A composition, obtained by incorporating n-pentane and/or isopentane with the titled composition containing a compressed gas having a large coating build-up with slight flying of spray particles but deficient in refreshing feeling as a propellant and having improved refreshing feeling.

CONSTITUTION: A spray composition for coating human bodies obtained by adding 0.5~50wt%, preferably 1~30wt%, based on the stock solution to be filled in an aerosol can, n-pentane and/or isopentane at 100/0~0/100, preferably 50/50~0/100 mixing ratio of the former to the latter to a spray composition for human bodies containing a compressed gas, preferably gaseous carbon dioxide, nitrogen gas, laughing gas or compressed air, as a propellant and capable of giving remarkable effect since the coating build-up on the coating surface is ensured without a fear of inhalation by humans because of slight flying of spray particles in application and very effective in application to injurious insect repellent, perspirant, external analgesic agent and anti-inflammatory agent, disinfectant, remedy for athlete's foot, etc., because of good refreshing feeling thereof.
